Heat, Wind, Rain, and Snow...  
Bring it on. Your Euroshield™  
roof has you covered in style.

EUROSHIELD™ Roofing Products were created 10 years ago with the goal of diverting and recycling the tremendous deluge of used tires ultimately destined for landfill. Years of research and development led to the creation of a unique formula, containing over 75% recycled materials, for the production of the finest synthetic rubber roofing products available on the market today. From 600 to 1,000 rubber tires are used in the production of a EUROSHIELD™ roof for an average-sized home. Scrap material generated during the installation process can be collected and recycled again – virtually eliminating environmentally harmful waste.

Euroshield™ manufactures 3 types of roofing systems... EuroSlate™, EuroTile™ and EuroShake™.

EuroSlate™ is designed to accurately replicate the look and texture of a traditional heavy chiselled-edge slate tile, but without the considerable weight and high cost associated with slate. EuroTile™ is designed to replicate a concrete tile with slate-like overtones and a smooth-cut exposed edge. EuroShake™ is the perfect choice for those who want the look of a wood roof without the worries of premature failure due to rotting, cracking and warping. It is available in 2 profiles, taper-sawn and taper-split... you decide which best suits your taste and your home's character.

**FEATURES & BENEFITS**

- Long Lasting and Durable
- Aesthetically Pleasing

**TESTIMONIALS**

"...I was extremely impressed with the easily apparent thought towards excellence that went in to the design of the system, from the interlocking bottom ridge and groove to the side locks, to the air pockets, right down to the drip edge and even the breath holes. All this and more and a 50 year warranty too. Truly exceptional!!!"  
- Don Brooks,  
Calgary, Alberta

"I would like to take this opportunity to thank everyone involved for the successful re-roofing of our home with the GEM EuroSlate. The visual improvements to our property is significant and both Denise and I are very pleased. We look forward to years of trouble-free service from this new roof."  
- Denise & Kyle Kitagawa,  
Calgary, Alberta

"...Our new roof has made a world of difference on the insulating properties it has provided...the catcomb design of the roofing material not only provides excellent rigidity but also a high degree of insulating capability. Thank you for coming to our rescue and providing us this quality roof."  
- Peter Martinez
